-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 7 claims, numbered 1-7.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on Sep 30, 2003 submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Specification

The disclosure is objected to because of the following informalities: on page 11, line 2, "Csequently" should be - - Consequently - -.

Appropriate correction is required.

Claim Objections

It is not clear if the instant claims are drawn to the subcombination of a stand for retaining box bodies, or to the combination of a stand and box bodies. The preamble of

Art Unit: 3632

claim 1 clearly refers to the former, but later one the latter appears to be brought in; for example clauses like "stand holding the box bodies"; limitation regarding the size of the bodies, etc. For the purpose of this Office Action, the claims are considered as subcombination claims and no patentable weight is being given to the box bodies.

Claim Rejections - 35 USC § 112

Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It appears that the claims refer to the shape labeled as 66 in the drawings; however, the specification does not recite any shape as being concave. Correction is required.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no recitation in claims 1, or 2 of heat radiation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3632

Claims 1, 2, and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Slaiken (Pat No 5,183,163). The patent to Slaiken shows a device comprising two outer stands (1, 2), an intermediate stand (3), and connecting means (7, 8) connecting the stands together. As mentioned before no patentable weight is being given to the box bodies.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Slaiken.

The shape of the middle stand shown by Slaiken is not concave; however to make it concave is considered to be an obvious matter of engineering choice. For example it can correspond to the shape of the article to be held.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Partain et al. (4,106,735) and Gonzalez (5,308,037) show a device comprising three stands; Hames (5,295,648), Yang et al. (6,352,162), Lin et al.

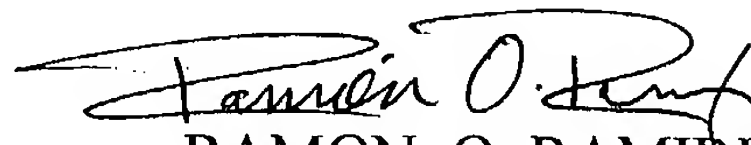

Art Unit: 3632

(6,364,278) and Robbins et al. (6,494,428) show stands having different connecting means. Helot (6,091,602) shows a stand for a computer element. Cunningham (6,471,180) shows a stand having a non-flat shape.
